Regional Conference

Eco-Companies in the Alpine Space
Strengths and Strategies for the Future

bigBOX Allgäu
Kempten
29 November, 2007

In March 2006 started the European Interreg IIIB project ASPECT.

ASPECT, which stands for "Alpine Space Promotion of Eco-Companies Transboundary", aims to foster economic growth of small and medium-sized eco-companies in the Alpine Space via support and promotion activities.

Some of the actions undertaken within ASPECT are:

- Strategic analysis of the situation of the eco-companies in the Alpine Space, development of common strategies and compilation of guidelines for public authorities and organisations on how to foster eco-companies develop-
- Support of business development, clustering and networking and starting of trans-national cooperations

Against this background, ASPECT partners Bayern Innovativ GmbH and B.A.U.M Consult are organising the regional conference "Eco-Companies in the Alpine Space".

The conference will offer institutions and companies a platform to exchange experiences among the Alpine Space regions. The compiled ASPECT-guidelines to support eco-companies will be presented and discussed among the participants.

The regional conference offers eco-companies the possibility to make trans-national contacts, to find technological or industrial partners in other regions and to learn more about the future offerings of the ASPECT-business network.

This event is organised with the support of eza!, the Chamber of Commerce of Augsburg/Schwaben, KUMAS and the Bavarian Environmental Cluster.

We would like to cordially invite you to participate.
